

In parallel coordinates, **one line** represents **one row** of a table and **each axis** represents **each column**. In this page, you'll draw parallel coordinates by clicking points on each axis per car. Once you finish drawing parallel coordinates of three cars, you will proceed to the next page. Now, please click on the points in parallel coordinates corresponding to the highlighted cell in the table.

name	MPG	Cylinders	Horsepower	Weight	Year
Plymouth Fury	30	3.5	160	2500	79
Volkswagen Pickup	40	7.5	120	3500	73
Ford Mustang	5	4	140	3500	77

Well done.
